EDUCATION

Texas Tech University

Bachelor of Science in Computer Science

GPA: 3.5

Lubbock, TX

May 2026

ACADEMIC PROJECTS

ApplyPilot AI – AI-Powered Job Application Tracker | *JavaScript, HTML, CSS, LocalStorage, Claude AI* 2026

- Designed and deployed an AI-assisted job application tracker to organize applications, manage resume variants, and monitor recruiting progress end-to-end.
- Implemented application analytics dashboards, status tracking workflows, and resume management features to streamline the job search process.
- Developed AI-powered job description analysis capabilities that extract company details, required skills, and role summaries from job postings.

TCP Traffic Anomaly Detection System (YapGPT) | *Python, TensorFlow, Pandas, NumPy, Scikit-Learn* 2025

- Developed a machine learning pipeline to analyze network traffic logs and identify communication patterns that deviate from expected TCP behavior.
- Engineered data preprocessing and feature extraction workflows to transform large-scale security datasets into structured model inputs.
- Implemented a CNN-based anomaly detection model to classify suspicious network communication patterns and improve threat identification.
- Generated automated reports and visualizations to support cybersecurity analysis.

SwimWear E-Commerce Platform | *React, JavaScript, Tailwind CSS, Node.js, Express.js, MongoDB* 2025

- Built a full-stack e-commerce application with responsive product browsing and shopping cart functionality.
- Developed RESTful APIs and integrated MongoDB for product and inventory management.
- Designed reusable React components and scalable frontend architecture.

Hurricane Relief Resource Management System | *SQL, MySQL, Database Design* 2025

- Designed a relational database system for managing shelters, volunteers, resources, and evacuee information.
- Created normalized schemas, SQL queries and ER diagrams to improve data integrity and retrieval efficiency.
- Modeled an information system for a community-facing use case with direct public-impact potential.

LEADERSHIP & EXPERIENCE

Student Development and Engagement

Lubbock, TX

Peer Mentor, Raider Ready Program & Tech Leadership Institute

January 2023 – June 2024

- Mentored 40+ students through structured academic and career support, helping them navigate resources and stay engaged in their goals.
- Developed organizational systems for tracking student engagement, progress, and program participation.
- Collaborated with university staff to improve student-facing resources and create inclusive learning environments.

Society of Women Engineers (SWE)

Lubbock, TX

Outreach Committee Member

August 2023 – May 2026

- Collaborated with engineering students to organize technical outreach events and increase participation in STEM initiatives.
- Supported event planning, communication, and community engagement efforts across campus programs.

TECHNICAL SKILLS

Programming Languages: Python, Java, JavaScript, SQL, C/C++, HTML, CSS

AI & Data Science: TensorFlow, Scikit-learn, Pandas, NumPy, Machine Learning, Feature Engineering, Data Analysis

Frontend Development: React, Tailwind CSS, Responsive UI Design, Component-Based Architecture, State Management (Context API)

Backend & Databases: Node.js, Express.js, REST APIs, MongoDB, PostgreSQL

Developer Tools: Git, GitHub, VS Code, Postman, JupyterLab, MATLAB
