EDUCATION

Texas Tech University

Bachelor of Science in Computer Science

GPA: 3.5

Lubbock, TX

May 2026

RELEVANT EXPERIENCE

Student Development and Engagement

Lubbock, TX

Peer Mentor, Raider Ready Program & Tech Leadership Institute

January 2023 – June 2024

- Mentored 40 first-year and transfer students across two semesters, coordinating check-ins, support needs, and follow-up actions.
- Led growth-focused activities that built academic, leadership, and time-management skills for new students.
- Served as Office Assistant, organizing data and administrative workflows to keep program operations on schedule.

Society of Women Engineers (SWE)

Lubbock, TX

Outreach Committee

August 2023 – Present

- Planned outreach and service events, coordinating logistics and communication to strengthen campus engagement.

LYFE Mentor Program, Whitacre College of Engineering (WOEC)

Lubbock, TX

Peer Mentor – Sponsored by ConocoPhillips

August 2024 – Present

- Provided academic support and guidance to first-year engineering students transitioning into the discipline.
- Helped mentees navigate challenges and connect with engineering resources and student organizations.

Tech Robotics Association

Lubbock, TX

Public Relations Officer

June 2023 – Present

- Coordinated outreach and volunteer efforts for local robotics events, managing communication across student groups.
- Collaborated with student organizations to provide robotics opportunities for K–12 students.

ACADEMIC PROJECTS

Full-stack E-Commerce Web Application | *React, Tailwind CSS, Node.js, Express, MongoDB*

January 2025

- Built a full-stack e-commerce app with a React/Tailwind CSS front end and Node.js/Express back end.
- Designed reusable UI components for product listings, collections, and checkout; used Context API for cart state and currency conversions.
- Developed RESTful APIs for product and order management backed by MongoDB.
- Implemented secure authentication, product filtering, and dynamic delivery fee calculation.

YapGPT – TCP Cyber-Threat Detection System | *Python, CNN, TensorFlow*

December 2025

- Collaborated on a senior capstone to detect cyber threats by analyzing large-scale TCP traffic logs for anomalies in the three-way handshake.
- Implemented preprocessing pipelines in Python using NumPy and Pandas to clean and structure raw CSV logs.
- Helped design and evaluate a CNN to classify TCP flows as normal or suspicious, reaching ~94–96% training accuracy.
- Contributed to a terminal-based CLI that loads traffic logs, runs anomaly detection, and outputs analyst-friendly reports.

Hurricane Relief System – SQL Project | *SQL, Data Modeling*

January 2025

- Designed normalized SQL schemas to model evacuees, shelters, rescue teams, and volunteers.
- Created ER diagrams and translated them into scalable, documented relational models.
- Simulated real-world disaster response scenarios using structured data in a team setting.

TECHNICAL SKILLS

Languages: Java, Python, C/C++, SQL (Postgres), JavaScript, HTML, CSS

Frameworks & Libraries: React, Node.js, Express.js, Tailwind CSS, REST APIs, pandas, NumPy, Matplotlib

Developer Tools & Platforms: Git, MongoDB, Google Cloud Platform, VS Code, Visual Studio, JupyterLab, Postman, MATLAB, Asana, Smartsheet, Microsoft Office Applications

Additional: Stakeholder communication, documentation, event coordination, process improvement, risk tracking
